Plastic Spring Box Guard: A New Concept from Masinara

Masinara **latest's innovation** is a **soft PVC guard** for spring boxes. **A patent application has already been filed for this product** offering complete sealing of the spring box edges and interior. **Advantages** include total shutter curtain **protection from scratches**, **enhanced ease of use and safety** for fitters since it stops fingers entering the spring box.
The guard comes in the form of a 25-metre roll, which is simply cut to the correct length and fitted around the spring box. Child's play, since it comes in a standard size suitable for all 60mm springs and can be fitted to shutter spring boxes already in use. Durability is certified with a test ratio of 15,000 cycles **in conformity with EU Standard EN 13241-1**.
